Parrot and Olivier in America

When my countrymen imagined America, they thought of savages and bears and presidents who would not wear wigs. Who among them could have conjured Miss Godefroy in all her beauty of form and elegance of mind, her wit, her delicacy, her slender ankles amid those mad red leaves? An exploration of the great adventure of American democracy, Parrot and Olivier in America thrillingly brings to life two characters who, born on different sides of history, come together to share an extraordinary relationship. Olivier is a French aristocrat, sent to the New World ostensibly to study its prisons, but in reality to save his neck in a future revolution. Parrot is the son of an itinerant English printer, sent to spy and protect him. With the narrative shifting between the perspectives of master and servant, we see the adventure of American democracy, in theory and in practice, told with Carey’s dazzling wit and inventiveness.

Discussion points

Half the story is narrated by Olivier and half by Parrot; why does Peter Carey choose to let them tell their own stories? What would be lost if the novel were told from a single perspective?

Do you agree with the review that said, “While enjoying Peter Carey’s Parrot and Olivier in America, I found myself wondering from time to time what it was about. I finished it with unabated enjoyment, still wondering.” Ursula K Le Guin, The Guardian

Parrot and Olivier in America has been described as ‘a comic adventure’; what makes the writing so humourous?

How does the relationship between Parrot and Olivier change throughout the novel?

In what way is Peter Carey’s portrayal of Parrot ‘Dickensian’?
